EUROPEAN UNION

PROJECT FINAL CONFERENCE - "INNOVATIVE SOLUTIONS FOR SUSTAINABLE MOBILITY"

Il ruolo delle TIC nella gestione del traffico urbano - The Role of ICT in urban traffic management

23 March 2011 - Palazzo Rinaldi - Treviso - Italy

L'implemento delle tecnologie TIC applicate alla mobilità e ai trasporti comporteranno innumerevoli vantaggi in futuro, inclusa l'opportunità di aumentare l'efficienza delle modalità di trasporto unita ai sistemi di gestione del traffico. Ulteriori ricerche dovrebbero approfondire e ottimizzare sistemi di trasporto multi-modale estendendoli alle fasce urbane e suburbane delle città, le quali integrano ulteriori sistemi di mobilità come i veicoli privati e/o differenti soluzioni per la mobilità individuale.

The implementing of new ICT technologies for mobility and transport will provide many advantage in the future, including the opportunity to optimise the efficiency of the modes of transport witch together comprise the traffic system. Further research should focus on the ottimizzazione of multi-modal transportation system extending to the wider urban and suburban areas, which integrate a range of trasportation modes including private vehicles and other solution for individual mobility.
